Tomasz Nowak

Senior Data Engineer
Berlin, Germany
tomasz.nowak@example.com
+49 30 000 0000

SKILLS

- Python (6 years), SQL (advanced), Scala (basic)
- Apache Spark, Spark Structured Streaming
- Apache Kafka, Debezium, Schema Registry
- Airflow, SQL modelling, data contracts
- PostgreSQL, ClickHouse, Parquet on S3
- Docker, Kubernetes, GitLab CI, Terraform
- Great Expectations, pytest

EDUCATION

MSc Computer Science
Warsaw University of Technology
2013 - 2018

LANGUAGES

- Polish (native)
- English (C2)
- German (B1, conversational)

SUMMARY

Data engineer with six years building and operating production data pipelines for mobility and e-commerce companies. I own pipelines end to end: event schemas with the producers, Spark jobs, orchestration, quality checks and the on-call that follows. I write the design documents my teams decide on and present the options to product managers.

EXPERIENCE

Senior Data Engineer - Kiezride (shared mobility), Berlin
March 2022 - present

- Built the streaming ingestion for vehicle telemetry on Kafka and Spark Structured Streaming, processing 120 million events a day with end-to-end latency under 90 seconds.
- Introduced data contracts for the eight core event types; schema changes now fail CI before a producer ships, which ended the monthly breakage of the rides dataset.
- Modelled the rides, vehicles and pricing datasets in ClickHouse and PostgreSQL and kept their interfaces stable for the analytics and ML teams for three years.
- Own data quality: Great Expectations suites and freshness checks on every dataset, and the on-call rotation for pipeline incidents.
- Mentor two mid-level engineers through design reviews; both now lead their own pipelines.

Data Engineer - Sklepio (e-commerce), Warsaw
July 2019 - February 2022

- Moved 40 nightly batch jobs from cron to Airflow with retries and SLAs; late reports dropped from several a week to about one a month.
- Wrote the Spark jobs that joined orders, returns and marketing spend into the daily margin dataset.
- Presented pipeline options and their trade-offs to product managers before each quarterly planning.

Junior Data Engineer - Sklepio, Warsaw
September 2018 - June 2019

- Maintained the PostgreSQL reporting replica and the Python ETL scripts that fed it.
